

# Using Video Detection For Transit Queue Jump

Javad Mirabdal

415.701.4421, [javad.mirabdal@sfmta.com](mailto:javad.mirabdal@sfmta.com)

Transit Priority Group

San Francisco Municipal Transportation Agency

# Presentation Outline

---

- Background
  - » 1989 Loma Prieta Earthquake
  - » Traffic Congestion in Downtown Area
- Video Detection For Transit Priority (Queue Jump)
  - » Why Video Detection
  - » How Video Detection is Used
  - » The Result
- Conclusions

BUSES

TRUCKS ONLY

# Problem Statement

# Queue Jump

# What is Queue Jump

- Queue Jump Gives Priority to one Mode Over Another
- Queue Jump has various applications
- It Can be a fixed phase or an Actuated Phase
- Pedestrian Head Start
- Transit Queue Jump
- Commercial Vehicles Queue Jump
- Right turn conflict with Pedestrian

# Existing Transit Vehicle Detection System

---

- Overhead Line Detection System
  - » Overhead Contact Pan
  - » Overhead inductive loop
- VETAG. Vehicle Tagging (Identification) System
- Presence Loop Detector in Exclusive Right-of-Way
- Cable Car Mechanical Switches
- Infrared System
- Push Buttons
- Video Detection

# Why Video Detection?

---

- Cheap
- Flexible
- Could be designed to be a “smart” detector

# How Camera Detects Turning Bus

Need a way to differentiate:

- Bus from other vehicles
  - » Length of object
- Right-turning buses from other buses
  - » Location
  - » Time

# Distinguishing Bus from Other Vehicles - Length

# Distinguishing Right-turning Buses from Other Buses - Location and Time

Stop line for bus detection

# Approaching Bus Video

# Flashing RX Video

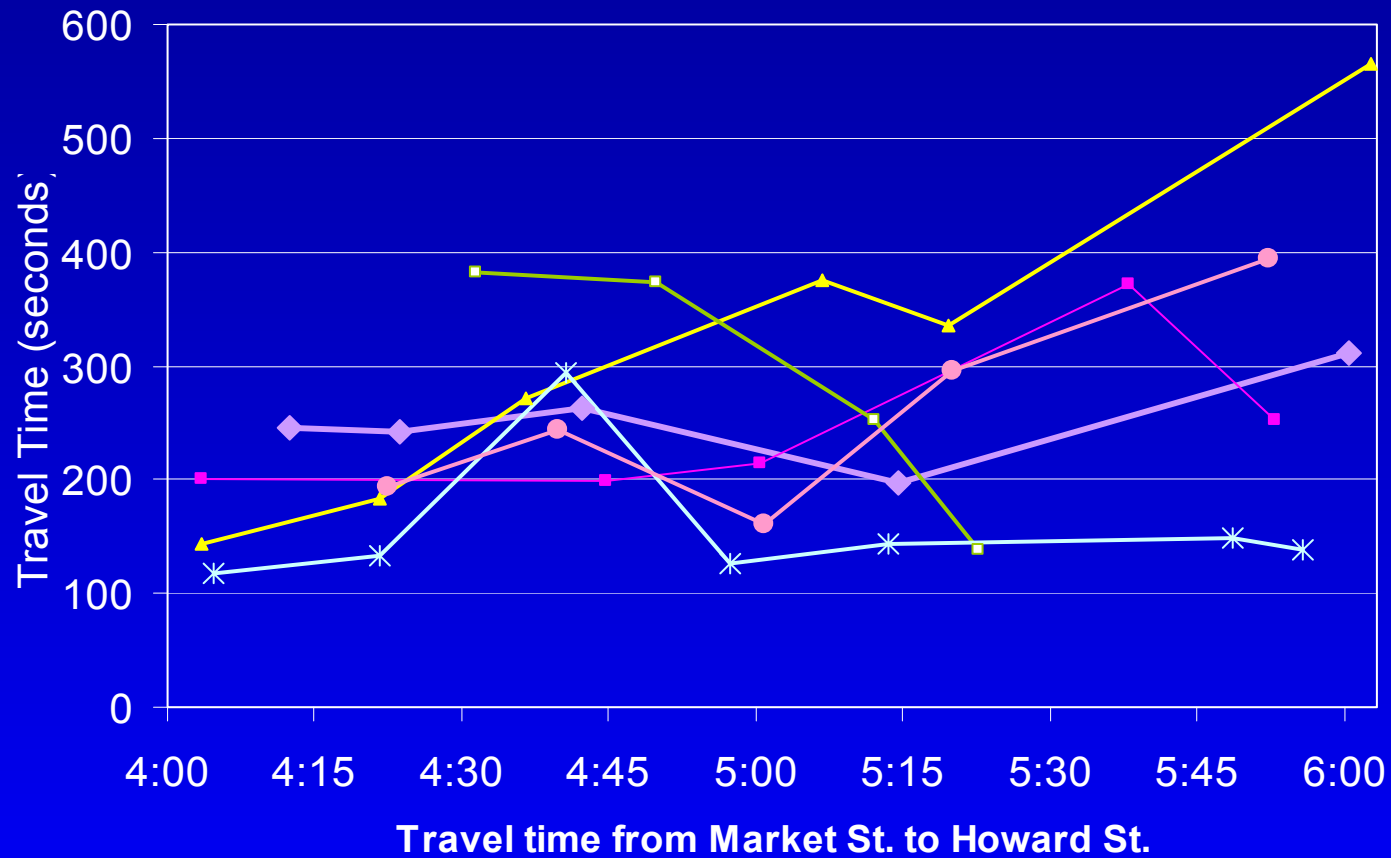

# Flashing RX to GX Video

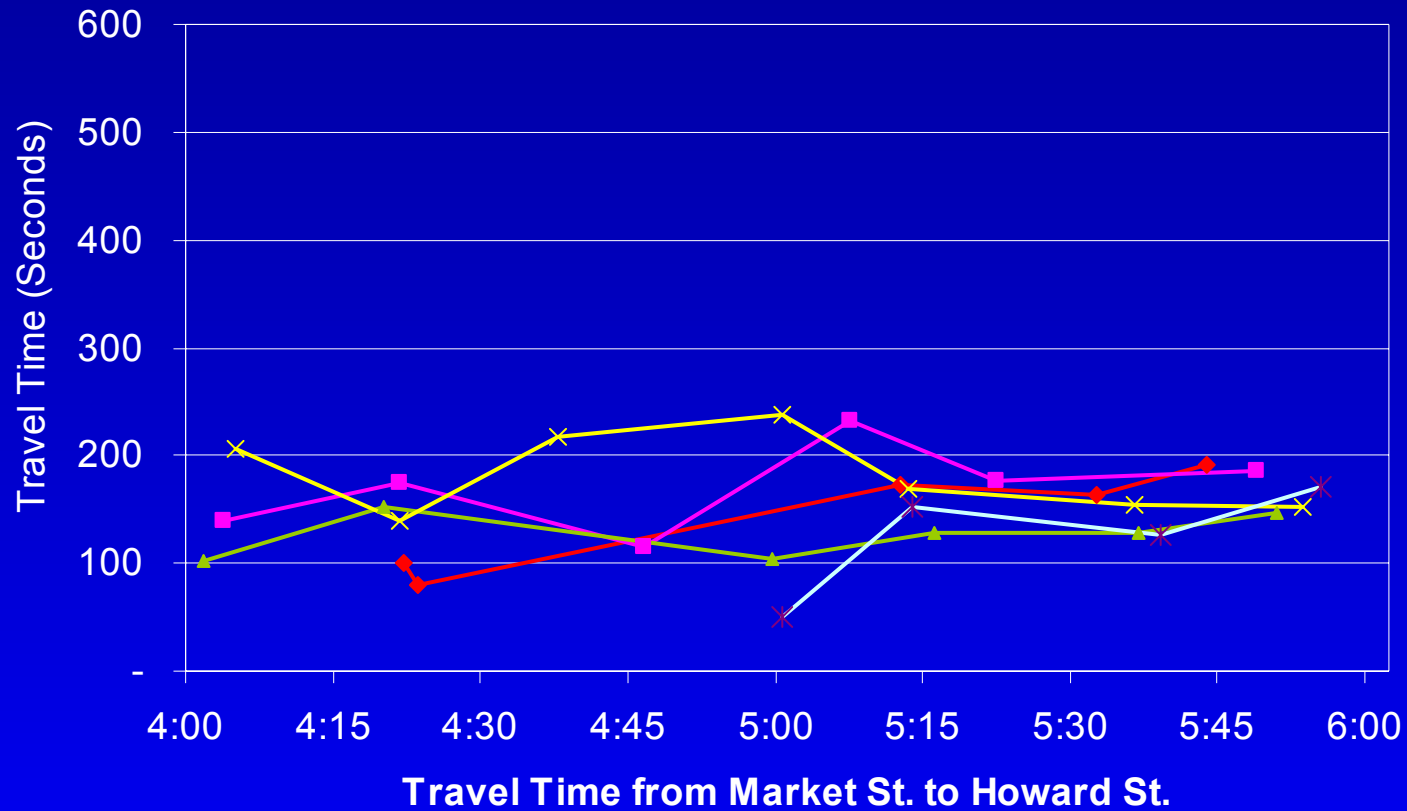

# Turning Bus Video

# Before Travel Time

# After Travel Time

# Before and After Travel Time Study

	Before (32 Buses)		After (28 Buses)		Savings	
	(min)	(sec)	(min)	(sec)	(min)	(sec)
Average	04:07	247	02:33	153	01:34	94
Min. Time	01:57	117	00:50	50	Time Savings 38%	
Max Time	09:25	528	03:58	238		
St. Dev.	01:43	103	00:44	44		

# Conclusion and Recommendations

---

- We have to be innovative to improve transit operation
- Video Detection Systems can be used as a Smart Detection System for Transit Priority (Queue Jump)
- Small scale, low cost improvements can have significant effects on system reliability.
